Manny Gdalevitch, Managing Director, Consultants Aeronovo

16.30 **SAF Business Innovation and Competitiveness for Corporate Aviation**

Evangelos Asimakopoulos, CO & Partner, Theia Innovations

17.00 Closing Remarks

SPEAKERS

Stephane Albert, Business Development & Partnerships, Pratt & Whitney Canada

Mr. Albert is responsible for Sustainability Strategies at Pratt & Whitney, while being the ICAO executive representative and Europe/Middle East Government relation representative. He is passionate about creating a sustainable aerospace industry and ensuring that the appropriate SAF commitments by 2030 are agreed during the ICAO CAAF/3 conference and COP28. Overall Mr. Albert supports all aspects of sustainable aviation across P&W, looking at diverse propulsion specific segments: such as Electric, Hybrid-Electric, Hydrogen and Fuel cell. He is also supporting IATA, ATAG, GAMA, Clean Aviation committees to ensure that stakeholders have a common view of the technical insertion challenges of these new technologies which need to include the airport and their ecosystem.

Michael Fedele, President, Exeaire Aviation

Michael Fedele has been serving as President of Exeaire Aviation since 2018. He previously held the position of Vice-President and General Manager of Exeaire, a division of I.M.P. Group Limited, beginning in 2009.

Before joining Exeaire Aviation, Michael had a distinguished career in the Canadian Air Force, where he worked primarily at the Aerospace Engineering Test Establishment in Cold Lake, Alberta. Following thirteen years of service, he transitioned to a role as an Instructor at the National Test Pilot School in Mojave, California. Michael then joined CAE, initially as Manager of Test and Evaluation, and progressed to Vice President and General Manager in their Civil Simulation and Training business unit.

In his current role, Michael oversees the operations of Exeaire Aviation, which includes four divisions and employs over 500 people across Canada and the U.S. The group is dedicated to providing comprehensive general aviation services.

Michael holds a Bachelor of Engineering Degree from the Royal Military College of Canada (1989), and is a graduate of the Empire Test Pilot School in the United Kingdom (1991). He also completed a Master of Science in Aviation Systems at the University of Tennessee Space Institute (1996) and earned an Executive MBA from the University of Colorado (2005).

Bret Peters, Aviation Specialist & Consultant, C.A.C. Global Solutions

Bret is a seasoned Canadian aviation professional, holding a diploma in Aircraft Maintenance Technologies, a Canadian Aircraft Maintenance Engineer's Licence, FAA Mechanic's Certificate in the Airframe and Powerplant categories, and a University degree in Business

Management. Enticed by his early start in a corporate aviation department, he's always strived to broaden his horizons by pursuing knowledge and experience in different areas of Civil Aviation.

He's unearthed an abundance of real-life industry experience in maintaining and managing numerous aircraft of various types and holding different posts in private, corporate, and commercial aviation environments before his latest adventure, in Aviation Regulation.

About midway through his career, he was pulled into the realm of Regulatory Authorities. This journey began with his becoming a Transport Canada Minister's Delegate – Maintenance, which over time morphed into being a full-fledged Civil Aviation Safety Inspector with Transport Canada.

Meanwhile, always in pursuit of expansion and knowledge, in a whirlwind, he found himself with another aviation Regulatory body; the Civil Aviation Authority of the Cayman Islands. Today, again finding his way home, he's a Director of his own consulting business; helping others, globally, wherever possible and sharing knowledge and experiences along the way.

Stephanie Ste Marie, Director - Private Jets, Air Charter Service

Stephanie Ste Marie is the Private Jets Director for Air Charter Service, a premier global provider of aircraft charter solutions. In her current position, Stephanie is responsible for leading the private jet sales division, overseeing a team of 10 aviation sales consultants, and driving the strategic growth of the company's private jet portfolio in Canada. With an extensive background in High-Net-Worth client management, business development and luxury travel, Stephanie brings over 13 years of industry experience to her role.

Stephanie is also an active member of CBAA and NBAA, where she contributes to industry discussions, and has a passion for educational initiatives, such as Girls Take Flight, which aim to inspire and guide the next generation of aviation professionals.

Annalisa Tombolato, Director, C.A.C. Global Solutions

Annalisa stepped into aviation at the age of 14 and fell in love with it. She studied aviation by attending "Arturo Ferrarin Aviation Institute" in Italy, where she also got her Private Pilot License. She then went on to obtain a Bachelor's degree in Aerospace Engineering, specialized in Maintenance and Management, at Politecnico of Milano.

She's worked in different environments, including Flight Schools, Commercial Air Carriers, Manufacturers, and Airworthiness Management Organizations. Her experience spans from Aircraft and Airworthiness Management, Engineering, Delivery and Re-delivery to teaching and aircraft brokerage.

As CAMO Post Holder of Cayman Aviation Consulting, she further expanded her horizons working with all kinds of different clients and types of operations, helping them manage their aircraft under different Civil Aviation regimes including EASA, the FAA, Transport Canada, San Marino Civil Aviation, and UK Overseas Territories Requirements.

Today, with C.A.C. Global Solutions, in addition to Aircraft Management Services, she provides Training Courses and Workshops in Aircraft Management.

She is co-author of the book "Introduction to Aircraft Management" where, with Bret Peters, she shares insights and reflects on the different aspects of managing aircraft.

SPONSORS

Exeaire Aviation is a division of IMP Group Ltd, and a key player in the Canadian aviation industry for over 60 years. The company offers a range of aviation services including aircraft management, charter flights, aircraft sales, aircraft maintenance & FBO services. It caters to both corporate clients and individual travelers, providing high-quality service and operational excellence.

Services Offered

1. **Aircraft Management:** Through turn-key and tailored approach, Exeaire Aviation's valued customers benefit from personalized and customer-centric service offerings focused on innovative solutions, transparency and value, while delivering the highest levels of integrity.
